Instead of pop with substance, we have pop with rum-pum-pum-pums. And, when there is substance, it is overshadowed by noble ideals packaged as art (pop). No shadow, but there are only a few artists who really nail the whole songwriting thing – and even then their words are inartic or passable as a message of emo away. Fortunately, an industry-created five-person band has an album coming out that is said to revive the art of pop songwriting. Early reviews of One Direction's Four praised the boys for maturing. But what are they growing up from? Distinctive sign-like texts, that's what. To prove this point, we dug into Hallmark's collection of feelings and 1D discography for pieces of prose that could go either way because they all have that thing. And one thing is saccharine. Some could be signed, sealed, delivered while others are belted by Mr. Harry Styles & co. See for yourself! This is just, like, the best quiz ever.
